Subject: Phosphate Enema - Brand Recommendation and Formulary Update

Dear Community Pharmacy Colleagues,

This is an update regarding the prescribing of **phosphate enemas** across Leicester, Leicestershire and Rutland (LLR):

- The recommended brand for phosphate enema is **Cleen® Ready-to-Use Enema**.
- Prescribers will be asked to specify this brand to ensure consistency and supply.
- The LLR Formulary will be updated to reflect this recommendation from **February 2026**.

Action for Community Pharmacies:

Please ensure appropriate stock of **Cleen® Ready-to-Use Enema** is available rather than the generic phosphate enema from February 2026 to ensure dispensing aligns with the recommendations in the LLR formulary. If prescriptions are received generically, please dispense Cleen® Ready-to-Use enema rather than the generic phosphate enema.

Thank you for your support in implementing this change.

Many thanks,

Shary Walker
